Sullivan Moves Toward "2000 Millenium Year" with Record Fall Enrollment

- All Campuses Report Record Fall Term Enrollment
- New Sullivan Library – "Hi-Tech" Success
- Graduate School Expands MBA Options
- B.S. in Hospitality Management Goes "Online" Worldwide
- College Expands Campus Computer "Networking"

Again this year, more and more high school graduates, college transfer students, and adults have chosen Sullivan than any other independent four-year college or university in Kentucky. We welcome all of our new and returning students.

Almost 3,600 Students

Sullivan College and its faculty and students excitedly look forward to the year 2000 with an expanding and dynamic college program. This fall, the College reached a record enrollment with almost 3600 students attending its Louisville, Lexington, Fort Knox, and extended campuses.

"Hi-Need, Hi-Tech Programs"

The summer quarter also saw record enrollments on the main campus in Louisville and the college's branch campus in Lexington and Sullivan's Fort Knox campus, and this was exceeded this fall quarter. Dr. Steve Coppock, Executive Vice President of Sullivan College said, "It is the unique blend of "hi-need," "hi-tech" programs offered at Sullivan, along with its expanding bachelor's and graduate school enrollment, which has lead to this enrollment surge." He added, "More and more high school graduates and students who have attended other colleges or universities are turning to Sullivan because of its fantastic graduate employment success rate of over 96% every year. More and more companies are contacting the college every day wanting to hire our graduates."

In other articles in this issue of The Herald, you will find stories and statistics about the graduate employment success record and the expanding number of companies calling Sullivan for graduates.

New Library Impact

One of the major dynamic improvements this year has been the opening of the new multi-million dollar college library building at Sullivan College. Some have called this hi-tech marvel a "computer box with books". It is set up for 200 network computer hook-ups and has both laptop and desktop computers accessing multi-databases around the world in the disciplines the college teaches. This beautiful facility has literally changed the learning atmosphere of the college (see library story on page 2).

Worldwide On The Web

You will also find stories in this issue about the Graduate School expansion; the new Bachelor's Degree in Hospitality Management going worldwide on the Internet; and the expansion of the college's computer networking of all student computer labs.

Students From 28 States

This fall, the college has students from over 28 states and several foreign countries in attendance. The last quarter of the 20th century is off to a fantastic start with lots of activities and student organizations expanding memberships. Watch the student newsletter for full details. We want to welcome all of these students to the Sullivan College campus whether they are attending classes during the day, evening, or on the weekends.
New and More New....

As students and faculty get settled into the fall 1999 class schedule, there is just so much new going on at Sullivan College that the Herald felt it important that we share with everyone what's happening.

**Sullivan Campuses Statewide**

Many students are not aware that Sullivan College, in addition to its Louisville campus, has a major campus in Lexington, Kentucky and another campus at Fort Knox.

**Food Service to Expand**

On the main campus, the past year has seen a beautiful new multi-million dollar library opened, the College food service center totally redecorated, two computer labs expanded with new computers installed, and a new computer lab dedicated to accounting and management students opened this fall. Coming in the next few months, the food service kitchen area will totally be removed and replaced with a brand new "scatter" system which will allow Sullivan students to go up to nine different positions to choose from a variety of new menu items.

**New Faculty Center**

In addition, the business and general education faculty will be moving to a new faculty center in what was formerly the College library plus four new classrooms will be available for student's use in part of the old library space and the space formerly occupied by the faculty. The faculty will have both a new computer support area where class material authoring can be accomplished and private meeting rooms to meet with students.

**Yes!! Expanded Parking.**

For evening and weekend students, the College has seen a new parking lot opened at Farmington just for evening school students. Many of our resident students living in college housing have also moved into furnished apartments at Breckenridge Square.
1,500 Celebrate Last Sullivan Graduation of 20th Century

Over 1,500 graduates and guests filled the Southern Baptist Seminary Chapel to its capacity as Sullivan College experienced its last graduation of the 20th century (or, if you are a stickler for accuracy, there is one more year, but...let’s still celebrate). Most colleges operate on traditional August to May school year and graduate in May of each year. Because Sullivan operates on the quarter system and graduates students four times a year in March, June, September, and December, it offers two full graduations; one in April and another in October. This October’s graduation featured the Vice-Mayor of Lexington, Isabelle Yates as its commencement speaker. Hundreds of graduates received certificates, diplomas, associate, bachelors and masters degrees in the dignified and formal ceremony.

The first graduation in many years to experience rain and the first major rain of the summer and fall of 1999 made the logistics a little difficult for everybody as they moved into position for the formal processional. But, as each graduate walked across the stage to receive their formal award from President A. R. Sullivan, the cheers from their family and friends and the pride that showed reflects the continued success of Sullivan College and its outstanding graduates. The Herald congratulates each and every spring and summer graduate of Sullivan College who attended this ceremony.
Basketball vs. Building a New Library -
College Leaders Say, "We Really Care"

The opening of Sullivan College's multi-million dollar, 20,000 sq. ft. library building this past year, opened a new era in the long history of Sullivan College. It has become very quickly the focal point of all academic activities on the main campus, called unbelievable by some "heroes." Yes, in Kentucky there is one college that says to its students, "we care" and the support of your academic and career aspirations are more important than basketball. That college is Sullivan College.

Unique Design
The design of the new library not only focused on providing space for the library's specialized books, audio visuals, and periodicals and newspaper collections, but also space for library users to optimize web-based subscription data and other hi-tech, state-of-the-art databases with electronic access. The library's design also addressed the dynamic space needs of classes and small groups of students who want to use the library. On the lower level of the library, there is a 75-station networked computer lab, a video viewing room equipped with large screen monitors with video and computer access, and several group study rooms where students can use library resources either individually or in small groups.

Hi-Tech Networking
The new library contains almost 200 networked and Internet accessible computer connections from laptop ports on all the desks on the main level to connections in all other offices and study areas with over 65 computer workstations currently active. The new Sullivan library doubled the number of computers available at the closest public library.

Easy Internet Access
Easy and convenient remote Internet access is available to users in the library, at home, or at work to the library's web pack card catalog.

Access to the web pack (the web-based public access catalog) provides a variety of circulations, lists of periodicals, databases, and a virtual tour of the college with maps and photos. This data can be accessed at www.sullivancollege.edu/library. The library contains hard book collections including one of the finest cookbook collections for its culinary arts students in this part of the United States, as well as one of the newest collections of business and business-related books to support the variety of business programs offered at the college.

Dedication Draws Crowd
The formal dedication of the library attracted a crowd of hundreds including Kentucky Senate President Larry Saunders, Mayor Armstrong, former Mayor Jerry Abramson, all three of whom hold honorary doctorates from Sullivan College. Allen Rose, currently Secretary of Workforce Development and former Sullivan College Board Member said, "This is a wonderful day in the history of Sullivan College. I am so proud to have been associated with the college when this decision to build this magnificent structure was made."

A Sincere Thanks
The Herald wishes to thank President Sullivan for that tough decision made in 1997.

Students utilizing laptop computers in one of the library study and reading rooms.
Graduate School Continues Growth

From a small beginning with a class of 17 in the winter quarter 1997, the Graduate School of Sullivan College currently has over 100 students enrolled pursuing a Masters of Business Administration (M.B.A.) graduate degree. With the number of graduates including eight whom received their M.B.A.’s at graduation this October, the College continues to meet the needs of business and industry with this dynamic new graduate program.

**Strong Leadership**

Under the leadership of Dr. Graham-Hill and other Graduate School faculty including Dr. Jeff Johnson, Dr. Richard Corum, Dr. James Perkins, Carolyn Granda and Fred Newby this program continues to meet the needs of graduates of Sullivan who have earned their B.S. in Business Administration and graduates of other institutions.

**Expanded MBA Options**

The Graduate School has expanded from its original curriculum to include options in management, information systems, human resource management, management skills, and entrepreneurship. An additional option dispute resolution is currently being studied.

**Now In Lexington**

Also this fall, the College opened its first graduate classes at its branch campus in Lexington, Kentucky.
New Legal Nurse Consultant (LNC) Program Draws Degreed RNs To Campus

An exciting new certificate program has been added to the Sullivan curriculum this spring. Registered nurses can enhance their nursing experience with studies in law leading to certification as a Legal Nurse Consultant (LNC). This certification enables them to work with attorneys, insurance companies, and medical organizations with their unique combination of medical and legal skills. LNC majors receive intensive course work in both substantive and procedural areas of the law that affect the medical profession. Students also complete course work designed for this particular profession including two courses in Legal Nurse Consulting and a supervised externship.

A Short, Specialized Certificate

This exciting opportunity for Kentucky’s professional registered nurses can be completed in six months during the day or 15 months on nights and/or weekends. Applications are still being accepted. Call 502/456-6505.
College Adds New “On the Internet” B.S. Degree in Hospitality Management

When Sullivan College opened its National Center for Hospitality Studies in 1987, it only accepted students in culinary arts and travel & tourism at the associate degree level. Since that beginning in 1987, the National Center’s enrollment has grown to a fall 1999 enrollment between 550 to 600 students in this division of the college. Degrees are offered in culinary arts, travel & tourism, baking & pastry arts, hotel/restaurant management, and professional catering. Graduates of these associate degree programs have accepted positions in hospitality and food service establishments, not only locally but also nationally and worldwide. This has lead to many graduates asking the college when it would begin to offer the next level of education at the bachelor’s degree level. That dream has finally become a reality this past June with students accepted at the junior level taking classes moving toward their bachelor’s degree in hospitality management.

Worldwide Access

Dean Newal Hunter, Hotel/Restaurant Management Department Chairman, Kerry Sommerville and Senior Vice President, Tom Davisson worked hard to have the first group of classes available over the internet to Sullivan graduates no matter where they work in the world this fall. Now, students anywhere in the world can register for classes at the junior and senior level to earn their bachelor’s degree in hospitality management.

A 2+2 Degree

This program is a pure 2 + 2 bachelor’s degree program. Very simply, it means that graduates from any of Sullivan’s five associate degree programs in hospitality studies (culinary arts, baking & pastry arts, professional catering, hotel/restaurant management or travel & tourism) will be automatically accepted as juniors in this bachelor’s degree program.
Sullivan Chosen To Host Regional ACF Culinary Competition

In spring 2000, Louisville will host the regional convention of the American Culinary Federation. Sullivan College has been selected to host the regional competition for professional chefs and students. Chef Derek Spendlove, Chairman of Sullivan’s Baking & Pastry Arts program, and a gold and silver medal winner of both the Culinary Olympics and the Culinary World Cup, will chair the committee putting on this event. Sullivan College has been designated as a platinum sponsor for this major regional convention. We look forward to welcoming all of the participants to our campus.
## Sullivan College Reaching For 1999 Record Graduate Employment Success

More and more local and national companies continue to contact Sullivan College to hire graduates for career positions. Just look at this partial list of companies wanting to hire Sullivan graduates recently.

**IT'S A FACT!**

No other Kentucky area college or university publishes Graduate Employment Success percentages to match Sullivan College year after year. Just check out this fantastic record of success!

Since 1995, the Sullivan College has published the name of each graduate who has accepted a position related to their Sullivan College education and training. In addition, the college has published a year-by-year report showing each and every graduate and the percentage of graduates of their programs who have accepted positions related to their education. The only graduates excluded from this yearly report are graduates continuing their education, the few graduates who did not want to use the employment service, and those graduates who have indicated that they are unavailable for employment during the employment reporting period.

The positions and graduates' names as published in this issue of the Herald only represent the past few months as well as indicating with a * those alumni returning to the college to use the college's graduate employment service and have accepted new positions related to their Sullivan College education. Graduates of the college have a unique benefit available at only a few colleges in the United States and that is to use the graduate employment service twice and as many times as needed in their lifetime to move up in their career fields. Graduates who have graduated over 30 years ago have returned to the college to use this service more than ever. This lifetime, fee-free graduate employment service alone is one of the most valuable benefits and services offered by Sullivan College and one that the college is very proud.
Sullivan Leads The Field – Kentucky’s Leading “Microsoft” Academic Training Program

Several years ago, Sullivan College was selected by the Microsoft Corporation to receive one of only five academic grants awarded for the development of computer education programs utilizing Microsoft in the United States. And, this past year, Computer Science Department Chairman, Terry Kibiloski, was invited to present a paper at a major Microsoft conference.

State’s Largest Enrollment
Sullivan has continued its relation with Microsoft and has expanded its role as Kentucky’s leading Microsoft Authorized Academic Training Program (AATP) with the addition last year of classes leading to Microsoft Certification as a Microsoft Certified Systems Engineer (MCSE). Since the first classes began 18 months ago, Sullivan has grown to have the largest number of people preparing for MCSE of any college or university in the state. Currently, over 300 students are taking a nine-month certificate program preparing them to sit for the six different parts of the Microsoft Certification examination.

Talented Students
Bobby Dean, coordinator of the Microsoft program, says, "We have some tremendously talented men and women who have chosen to come to Sullivan for their certification training." Although there are a number of Microsoft Authorized Technical Educational Centers offering classes, Sullivan’s ability to provide the training in a convenient time schedule to meet the students needs and to award accredited college credit to the students completing the different sections of the course have drawn more and more students to come to Sullivan. All credits earned in this program can be transferred toward Sullivan’s bachelor’s degrees in computer science or other areas.

Authorized Testing Site
Most recently, in order to enhance the students ability to take the certification examinations, Sullivan has been certified as an authorized test center where students can take the Microsoft directed test itself under control conditions meeting Microsoft standards. Sullivan now includes the cost of the certification tests in tuition.
Networked Computer Labs and New Computers Serve Growing Sullivan Students' Needs

Over the past year almost daily, you can see someone on a ladder running new networking wiring through all parts of the main college campus building as Sullivan College moved to network all administration and academic computer lab facilities. Using a Microsoft NT System with centralized servers, all of Sullivan's seven computer labs are now networked allowing software to be shared among all computer stations and for software applications to be available to students, faculty, and staff as needed in the classroom or in their work areas.

Net Expands to Library

In addition, when the new Sullivan College library opened, it was totally wired and networked for the 21st century. The library offers the latest systems available to allow our students to access multiple worldwide databases and software applications from any computer within the library. Network ports are available at tables throughout the library to allow students to use network-capable laptops and notebook computers.

At the current time, there are over 400 computer port positions where students, faculty and staff can be networked through the College's servers to computer applications and worldwide databases. Using a high level system called ViperLink, which is a wireless system, the College is even able to integrate remote campuses to the main Sullivan campus without the use of telephone lines and modems as the connecting device. With the priority to keep its computers up-to-date, Sullivan College continuously is adding new hardware and software to enable all students to receive quality computer training, including over 60 new computers added in the past four months.

Watch Out For Those Ladders

So, the next time you see somebody standing on a ladder with their head up inside the ceiling, don't be concerned. It's just another member of our Information Technology support staff adding additional wiring to our network to enable everyone on the campus to meet the computer demands of this year and into the 21st century. The college is committed to keeping itself updated and to meeting all academic and administrative needs.

"I considered many education options. Sullivan College was right for me because of the strong academic environment. Lots of class time over an extended period was the greatest benefit. Sullivan College was a great choice."

—Charlie Gabriel
Microsoft Certified Instructor and Sullivan Graduate

Pictured above is one of the network control centers manned by members of Sullivan College's Information Technology (IT) staff who monitor the multiple networks available to students throughout the college campus. To the right, evening and weekend students studying to take tests to become Microsoft Certified Systems Engineers (MCSE) in one of the College's computer labs.
“Belle Cruises” Highlight Fall Term

A tradition at Sullivan College has been cruises up the Ohio River to allow new students and returning students to have a chance to meet each other on a more formal basis. This fall, one cruise was held at the beginning of the term for day students and a second one this past week for evening and weekend students. As you can see, the day cruise showed everybody having a great time on the Ohio on the fantastic steamship Belle of Louisville.
Chef Castro and Students Star at New York Culinary “Carnegie” – “The James Beard House”

Written By: A.J. Sullivan, President
Chef John Castro (above, far right), Executive Chef-Instructor of Sullivan’s on campus three and 1/2 star gourmet restaurant, Winston’s, five of his students, and Winston’s General Manager, Greg Fearing, traveled to New York City this past spring to cook at the world famous James Beard House. In an article in the Louisville Courier-Journal, Sarah Fritschner, Food Editor said, “The James Beard Foundation, housed in the former home of the father of American cooking,” was established as a charitable foundation in 1986 to promote all aspects of the culinary arts. It serves as a culinary center serving meals to members and the general public, holding classes, offering tastings and other gastronomic endeavors. Chefs come from near and far to cook meals.” She then wrote, “Only two other culinary schools have made appearances at the house, The New England Culinary Academy and The French Culinary Institute (in New York).”

A Magnificent Meal
I personally had the opportunity to travel to New York to partake of this wonderful recognition of our college, Winston’s Restaurant, and our outstanding culinary arts students. The New Yorkers packed the Beard House for a Sunday brunch and Chef Castro and the students prepared a magnificent meal much of which came directly or indirectly from our Winston’s menu. The meal included such items as Belgian Endive with Mored, Galette de Riz with Roasted Lobster, English Pea, Polenta Crisp with Gatton Farm Country Ham Sausage, Poached Eggs, Seasoned Cream and Tomato Conescece,
In an effort to reach more and more future students and to provide a source of information for current students and graduates located around the world, Sullivan has added its own web site which currently provides a variety of information about the college, its programs and admissions. A recently added section on the Graduate School and the Graduate Alumni Association has broadened the information available.

**Exclusive Alumni Site Planned**

Plans for the future include a section of the web site devoted exclusively to alumni wishing to either list positions in companies where they work where Sullivan graduates could be hired, or to list their resume in a secured section so that other alumni could know of their availability and interest in changing positions. With graduates of the college located now literally around the world, this worldwide graduate employment service expansion will prove to be an exciting addition.
Tourism and Hotel Management Students “Cruise Pacific”

As a part of their degree programs, travel and tourism students and a select group of hotel/restaurant students from Sullivan spent a week experiencing a “familiarization” (FAM) tour to prepare them for their careers in these fields.

A Week in Paradise
The student’s trip began at Louisville’s International Airport where they boarded a 7:00 a.m. flight bound for Los Angeles. They were met at LAX Airport by a chartered motor coach and after a quick stop at the Sportsmen Lodge Hotel and Resort to drop off luggage, students and faculty were taken to Universal Studio Theme Park. This was the first time trip to California for most students on the trip. “Universal Studios is a lot different from Walt Disney World in Florida,” said one student. It seems to be a theme park that is more geared to adults.

Special Back Lot Tour
The “back lot tram tour was tops” stated Ibn Johnson, hotel/restaurant management major. “The special effects and seeing all the famous houses and streets seen used in television shows and movies was really great.”

Cruise To Mexico
After a day of fun at Universal, the group rebounded their charter for a short drive to the Port of Los Angeles where they boarded Carnival Cruise Lines MS Holiday for a four-day cruise down the Pacific Coast to Mexico.

Ship Outstanding
“Unbelievable” stated travel and tourism students as the group toured the ship and the many restaurants and features. “This was a great trip,” said travel student David Weed. “It was a lot of fun and an awesome learning experience.” This learning experience is another opportunity for Sullivan students to experience to real world as they prepare for their careers.

New Evening and Weekend Culinary Arts Program Began Second Class This Fall

In response to a tremendous demand, Sullivan College made the decision to offer its nationally recognized culinary arts and professional cook’s program to students attending at nights and on weekends. The first class of students began with the summer quarter in July. Another group of students began classes this fall. This program is designed for people who currently have or need to keep full-time positions during the day and are only available to expand their career opportunities at nights and weekends. Sullivan’s regular faculty is currently teaching these classes with lecture and lab classes either held on Thursday, Friday, or Sunday and lab classes held on Saturday between 8:00 a.m. and 3:30 p.m. Students in this program are eligible for financial aid as our regular students attending during the day.

Top Attendance

Chefs Mik Milster C.E.C. and Chef Al Schmid are teaching the first classes. Chef Milster said, “I have never had a class where attendance has been so good. These students really want to become professional chefs, and I am excited to be teaching them.”

How To Enroll

For additional information about evening/weekend classes, please call the Sullivan College admissions department at 502-456-6505.

Adult students have an opportunity to attend evening and weekend classes without disrupting their busy work schedule.

Applications are now being accepted for classes beginning in the winter quarter – January 2000.

Every Opportunity

Dean Newal Hunter added “This is an exciting opportunity for working adults to receive a professional culinary education on a schedule that fits around their current work schedule.”
Culinary Team Proves That They Are #1 in Cincinnati

Continuing its gold medal tradition, the culinary team of Sullivan College’s National Center for Hospitality Studies, under chef instructor and coach, Derek Spendlove, roared through the regional A.C.F. (American Culinary Federation) culinary classic competition recently held in Cincinnati. Thomas Hiney led the competition with 3 gold medals and best of show.

“When I came to Sullivan College, I put high expectations and demands on myself and my education. With the aid and encouragement of my chef-instructors and all of the opportunities available, my expectations have been exceeded,” said Hiney.

Team Tops Competition

Christina Fields-Nevius and Christopher Flaniken also won gold medals for the hot foods competition. The entire Sullivan team led the competition in medal production.

World Cup Medals Won By Sullivan Chef and Student in Luxembourg

This past year, Baking & Pastry Arts Department Chairman, Chef Derek Spendlove, C.E.P.C. was selected to be the pastry chef on one of the team’s representing the United States in the Culinary World Cup in Luxembourg in Europe, which finished eighth in the world.

40 World Class Teams
More than 40 teams from the United States and around the world competed in this competition. Culinary arts and professional catering student, Traci Badenhausen (pictured left) traveled with Chef Spendlove (pictured right) to compete in the student competition. She was the first member of Sullivan’s Culinary Arts Team to compete in a World Cup event. Traci was one of three apprentices that represented the team. Three days after the competition, student apprentices had the chance to compete for individual awards.

Six Months’ Work
In order to perfect their recipes and presentation, the culinary team prepared for six long months for the world cup competition.

Sullivan Well-Represented
Traci Badenhausen won a silver medal at the competition for Garde Manger. Chef Spendlove, pastry chef and team manager of the U.S. Culinary Team Midwest, won a silver medal for his pastry display and a bronze medal for his centerpiece design.

Chef Spendlove World Class
In addition to the medals won in the World Cup, Chef Spendlove is a former member of the Irish Culinary Olympic Team where he received gold medals for his performance in world culinary competition.

Career Fair Draws Hundreds

Over 100 representatives of companies nationwide including some of the countries leading resorts, hotels, and major companies recently filled the College cafeteria and overflowed into an adjacent area as hundreds of Sullivan students came to meet and be interviewed by these companies. Dressed for interviews and resumes in hand, the Sullivan students were welcomed by representatives from companies such as Hyatt, Caesar’s, Marriott, and other businesses and industries locally and from across the country.
